Week of Lobby Creation Date

This graph shows the weekly view of client volume (number of tasks associated with a SNAP case) at each office. This data also displays the weekly volume of tasks across all offices. This data only accounts for SNAP clients where a task has been created when an individual has been checked into the lobby. A list of the actual tasks have been included in a separate spreadsheet.

Week of Lobby Creation Date

This graph shows the weekly view of the average time SNAP specific clients are waiting in each office. This data assumes that a family on multiple programs is coming into the office to be served for SNAP even if they are checking on the status of additional programs (i.e. Medicaid, Child Care, etc.). The wait times represented in this list are for the same population represented in the 'Volume of SNAP clients' report. Daily wait times are tracked in a separate spreadsheet which is included.

The State tracks wait time from the point of arrival to a check in booth, at which point a ticket is issued. All clients are required to proceed to security before reaching the ticket booth, limiting our ability to track clients before this point.

SNAP Case Documents

SNAP Case Documents - This graph shows the number of SNAP Case documents which have been scanned and indexed and falls under the following categories since September 2016– Interims, Recertification's, Expedited SNAP, Change Documents, Verifications, and Non-Expedited SNAP. There is also a designation included called 'Application backlog w/out Program Designation which accounts for applications which have been scanned and indexed however no program has been assigned during the application registration process (application registration still in progress for this population). The data is included in this report and will be incorporated into the FNS backlog template following the submission of the corrective action plan responses.

SNAP Cases Terminated - This graph shows the number of SNAP Cases terminated as a result of a processed change or other ineligibility factor (to include non-receipt of recertification packets). The date displayed is the date that eligibility is authorized for a cases which was terminated. The requested terminations and reasons are included in a separate more detailed report as requested. Please note that an individual case can be terminated for more than one reason. For example if an individual exceeds the gross income limit, net income limit, and has an FPL > 130% then three records will be counted in the detailed reason report however this summary report shows the case terminated one time.

SNAP Case documents	SNAP Cases Terminated	SNAP B Issuand		FNS - 388		AP certification ckets Received	C al I

APR - 2017 \$1	,729,833						
MAY - 2017 \$	1,840,635						
JUN - 2017	\$2,927,667						
JUL - 2017 \$163,189							
Grand Total						\$18,341,819	

SNAP Benefit Issuance - This view shows the amount of Monthly Benefit Issuance along with its corresponding daily issuance amount. The monthly numbers represent the amount issued at the time of the monthly batch issuance process where as the daily number represents daily transactions which occur throughout the month. The daily issuance amount would change due to retroactivity taking place on the daily basis. The total number of cases with duplicate issuance since the last report was 7 cases. All 7 cases were as a result of manual issuances and none as a result of system issues.

SNAP Recertification Packets Received - The data represented in this graph represents the number of individuals who were up for recertification in a given month. Data in past months remains consistent with what was reported historically for these months.Past recertification data is a snapshot of the data at the end of the month of the recertification period. The current month recertifications will represent the current status and the numbers will continue to change through the end of the month.

---	----------------	--	--------------------------	--	--	--

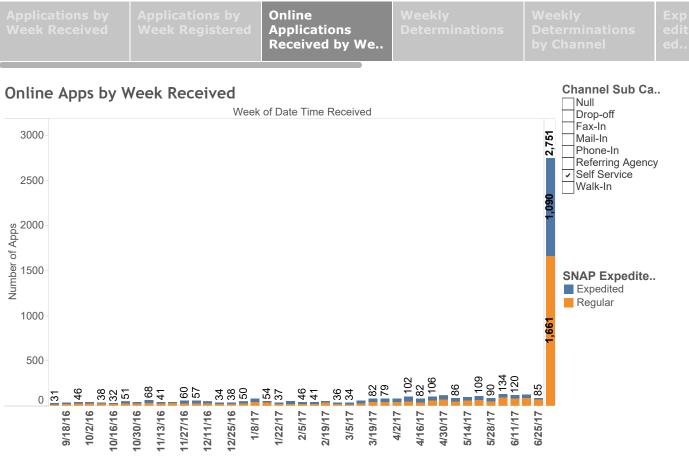

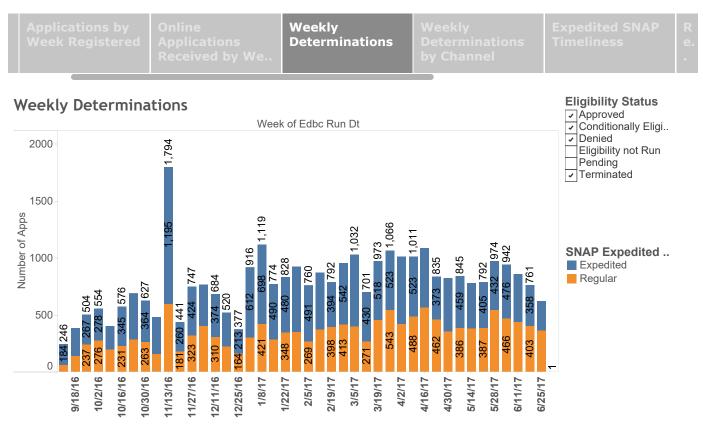

This graph shows the number of SNAP applications by the week in which they were received. Received date is defined based on the date stamp on the application corresponding to the day when the applicant filed their paperwork with DHS. Applications are defineded as DHS-2 Applications, or those documents indexed as DHS-2 Applications. It is possible that mis-indexed documents will show up in this count, and if they are re-indexed these values will change. This graph shows all applications, work in progress and determined.

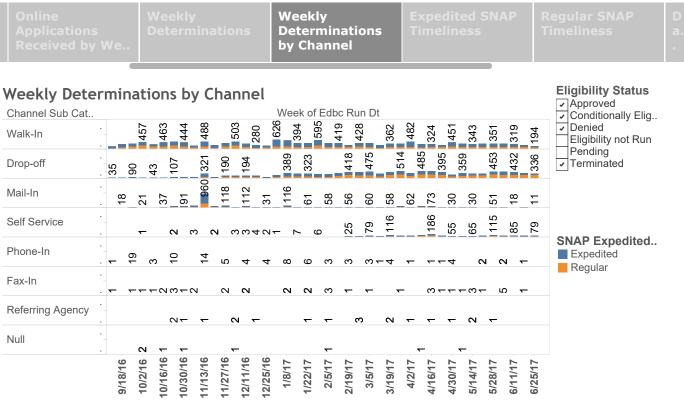

This graph shows the number of SNAP applications by the week in which they were registered (put in to RI Bridges). Registered date is the date on which a clerical worker took the paper form and entered it in to the system to be worked by an eligibility technician. This graph shows all applications, work in progress and determined.

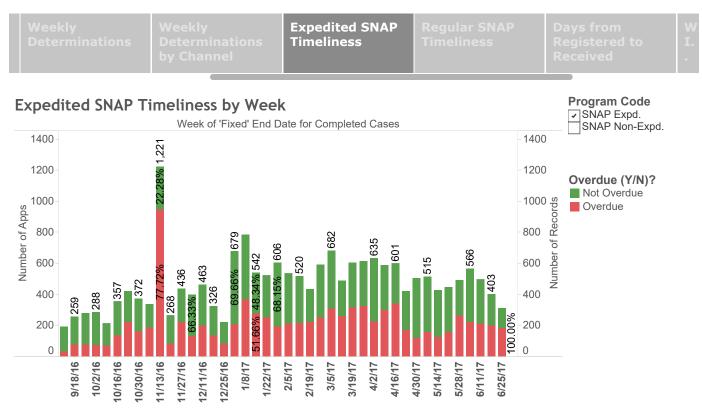

This graph shows the number of SNAP applications submitted through the self service portal by the week in which they were received. This graph shows all applications, work in progress and determined.

This graph shows the number of determinations by week for SNAP applications, and whether those applications were expedited or regular. The date used is the last date eligibility was run according to a custom extract from RI Bridges created in December 2016 for management purposes. This date is different from previous reports, and therefore data may differ. We continue to refine this data and extract to be as accurate as possible, and are investigating any "null" results or idiosyncracies.

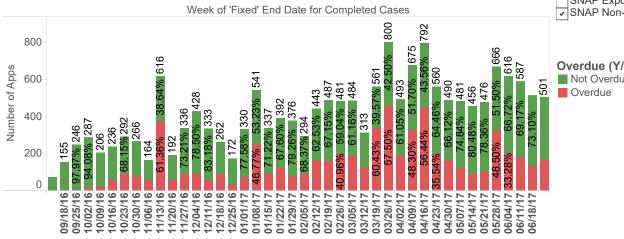

This graph shows the number of determinations by week for SNAP applications, and whether those applications were expedited or regular, by the channel through which that application was submitted. The date used is the last date eligibility was run according to a custom extract from RI Bridges created in December 2016 for management purposes. This date is different from previous reports, and therefore data may differ. We continue to refine this data and extract to be as accurate as possible, and are investigating any "null" results or idiosyncracies.

Regular SNAP Timeliness

Regular SNAP Timeliness by Week

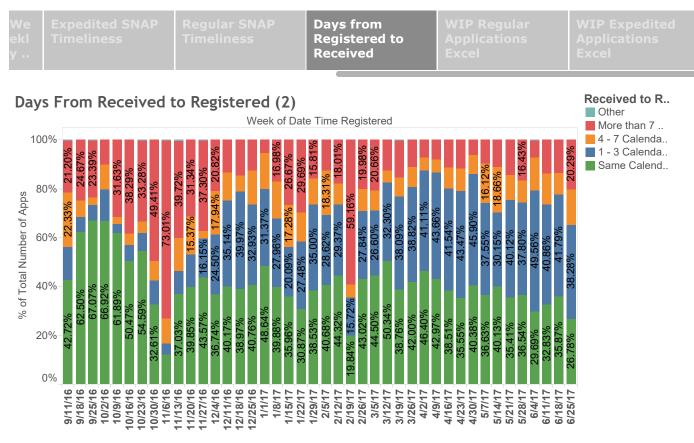

This graph shows the number of regular determinations by week for SNAP applications, and whether those applications were determiend within 30 days or receipt, or not. The days are calculated as the number of days from date application received and the date the final eligibility determination was rendered. This does not take in to account any weekends, holidays or anything else. It simply counts the number of days from received to eligibility rendered. Consequently, it is the most aggressive timeliness measure that we could use. The date used is the last date eligibility was run according to a custom extract from RI Bridges created in December 2016 for management purposes. This date is different from previous reports, and therefore data may differ. We continue to refine this data and extract to be as accurate as possible, and are investigating any "null" results or idiosyncracies

SNAP Expd. ✓ SNAP Non-Expd.

Program Code

Overdue (Y/N)? Not Overdue

This graph shows the percent of applications that were registered in that week, by the number of days it took from received date to registered date. The formula counts the number of days, regarless of weekends or holidays. Anything marked same calendar day was received and registered the same day; 1 calendar day the next day, etc. Our goal is to register everything within 2 calendar days.

This table shows for all work-in-progress (applications awaiting determination) the number of calendar days they have been pending since receipt. This is divided in to "responsibility status." To better define application status, we have developed a custom data query and split the responsibility based on the definitions below. We anticipate continuing to refine these statuses. We are actively using this chart to investigate why applications have been work in progress for a significant period of time, including any technical, system or operational issues.

Responsibility status is defined as follows:

Client - Includes any application where an application is pending more information from a client, or where an interview has

been scheduled, or an interview was missed by the client. This category also includes any application where RDOC was issued and the due date for that RDOC submission has passed. However, these applications have not yet been denied by an eligibility technician or by RI Bridges for failure to submit documentation

DHS - Includes any application awaiting initial processing (intake) or final processing once an interview has been held or an

applicant supplied additional information and an eligibility determination can now be made.

Not asigned - Includes applications that have been authorized for payment, and/or reached an eligibility determination but not

authorized, but remain in a "case pending" status. We are working through any applications that fall in to this category to

understand any system, process or technical issues that may be holding up the application.
