Recertifications

The purpose of this report is to identify recertification forms that were submitted within timeframes requiring State action.

The report will further identify which recert forms require State action (red) and which require client action (green).

Data for all months should be current as of the date that the report is run.

Changes over time in red categories will reflect the State's progress in addressing backlogged documents that require State action.

Application Summary

The purpose of this report is to identify trends over time in pending applications.

Only information for the current week will be added/updated. However, this weekly data should reflect all pending applications.

As a new week's data is populated, the previous weeks' data will remain as a historical record.

The Application Summary Report should include unprocessed cases.

As indicated by the separate charts in the Application Summary report, potentially expedited applications should be reported separately.

Interim Report

The purpose of this report is to identify interim reports that were submitted but not acted upon by DHS.

Data for all months should be current as of the date that the report is run.

Case Documents

The purpose of the report is to identify trends in unprocessed verifications/change documents.

Report should include **all** unprocessed SNAP verifications and change documents, regardless of whether the associated case is active or inactive.

Only information for current week will be updated. The previous weeks' data will remain as a historical record.

DHS must also generate a list of the specific documents comprising the weekly report.

Unidentified Docs

The purpose of the report is to account for all documents that have not been linked to a specific case.

DHS should also identify the count and percentage of different types of documents comprising this report.
